***MSC Evaluation of Alaska Salmon Fisheries***

***Performance Indicators and Scoring Guideposts***

Scientific Certification Systems, Inc. (SCS) is proposing to use the same 'Performance Indicators' and 'Scoring Guideposts' proposed for use in the independent evaluation of the California salmon fisheries and British Columbia Salmon fisheries for the re-assessment of the commercial salmon fisheries in Alaska.

Beginning 28 February 2005 SCS will be taking comments on the proposed performance indicators and scoring guidelines for 30 days (until 30 March 2005). All comments should be sent to Chet Chaffee at SCS using the contact details shown below. Comments should be made as specific as possible to individual performance indicators and scoring guides, and include constructive criticisms for improvement where disagreement occurs.

The set of 'Performance Indicators' and 'Scoring Guideposts' can be obtained by download from the MSC website ([www.msc.org](http://www.msc.org)) or by contacting:

Chet Chaffee  
Manager, Marine Fisheries Conservation Program
