

New Zealand Hoki Fishery

Marine Stewardship Council Certification Certification Body: Intertek Moody Marine

Performance Indicators and Scoring Guideposts

We are now entering the next stage of the re assessment of this fishery against MSC Principles and Criteria for Sustainable Fishing.

The assessment team propose to use the default assessment tree contained within the MSC Certification requirements, Part C _ Fishery Certification Requirements version 1 August 15 2011, in the independent evaluation of this Fishery.

Further information regarding this can be found at <http://www.msc.org/about-us/standards/fam>. The complete MSC Certification Requirements will be provided on request.

We welcome any comments on the default assessment tree that we propose to use in relation to this fishery. All comments should be sent to Intertek Moody Marine using the contact details shown below. Comments should be made as specific as possible to individual performance indicators and scoring guideposts, and their suitability or not for use in assessing this fishery. The MSC have provided a template for stakeholders to submit any comments on an assessment this can be found at <http://www.msc.org/documents/scheme-documents/forms-and-templates/msc-template-for-stakeholder-input-into-fishery-assessments/view>

Your comments are welcomed, in the first instance, up until 1700 GMT on 10th November 2011. We would, of course, be available to discuss these during any future meetings.

Should you wish to obtain further information on the Marine Stewardship Council, this is available on their web site at <http://www.msc.org>. As a certification body, Intertek Moody Marine has dispute resolution procedures available should these prove necessary.

The Contact details for Intertek Moody Marine are:

Paul Knapman	Jo Akroyd
