

US/ Canada Pacific Hake Mid-Water Trawl Fishery

Certification Body: Moody Marine Limited

Surveillance Audit

Following certification of these fisheries, we are now in a process of annual surveillance audits.

These audits have two principal functions:

1. To review any changes in the management of the fishery, including regulations, key management or scientific staff or stock evaluation
2. To evaluate the progress of the fishery against any Conditions of Certification raised during the Main Assessment

The surveillance audit will be conducted on-site by Steve Devitt and Mark Pedersen, team members Jeremy Collie and Max Stocker will be available to join stakeholder consultations via teleconference. During the surveillance audit, we shall be speaking with, among others, representatives of the fishery and fishery management organisations. We expect to carry out most meetings over the period 20 - 21 September 2009 in Seattle, Washington.

Should you have any information on this fishery that you feel should be considered in the audit, please advise Moody Marine. We may be available to meet with stakeholders in person or via teleconference as appropriate. If you would like to arrange a meeting, please advise us of:

- a) your name and contact details
- b) your association with the fishery
- c) the issues you would like to discuss (in order for us to arrange appropriate representation)
- d) where and when you would like to meet
