

Japanese Pole and Line Fishery for Skipjack Tuna Tosakatsuo Suisan

MSC Certification
Certification Body: Intertek Moody Marine

Surveillance Audit

Following certification of this fishery, we are now continuing the process of annual surveillance audits of the fishery. These audits have two principal functions:

1. To review any changes in the management of the fishery, including regulations, key management or scientific staff, or stock evaluation
2. To evaluate the progress of the fishery against any Conditions of Certification raised during the Main Assessment

During the audit, or at separate meetings, we shall be speaking with representatives of the fishery and fishery management organisations in Yaizu city, Shizuoka pref. in Japan. We expect to carry out meetings on **21st and 22nd of September 2011.**

Should you have any information on this fishery that you feel should be considered in the assessment, please advise us. We may be available to meet with stakeholders as appropriate. If you would like to arrange a meeting, please advise us of:

- a) your name and contact details
- b) your association with the fishery
- c) the issues you would like to discuss (in order for us to arrange appropriate representation)
- d) where and when you would like to meet

The audit team members are Jo Akroyd (lead Auditor) and Peter Kimura

We would also be happy to receive any correspondence or for you to contact us individually.

Yours sincerely

Jo Akroyd
