

# THE CHRISTMAS LOBSTAR

Teacher resources - Lesson plan

Recycle me

# LESSON OVERVIEW: THE LOBSTAR

In this 40-60 minute lesson, learners will discuss lobsters using the clip [The space telescopes inspired by lobsters](#) as a starting point. Learners will examine some key differences between Australian and European/American lobsters while crafting a LobStar Tree-Topper for the festive season. This lesson is suitable for learners aged 10+.

## Key terms

- Seafood
- Rock Lobster
- Space
- X-ray Telescope
- Wide-angle vision
- Reflection
- Refraction
- Sustainability

## You will need

- The clip [The space telescopes inspired by lobsters](#)
- LobStar Tree-Topper Instructions & Activity Sheet (page 3 & 4)
- LobStar Craft supplies - see page 3

## Australian Curriculum

### Science

Stage 3 - [ACSHE083 / ACSHE100](#)

Stage 4 - [ACSHE119](#)

[ACSHE120 / ACSHE135](#)

[ACSHE223](#)

### Visual Arts

Stage 2 - [ACAVAM111](#)

Stage 3 - [ACAVAM115](#)

Stage 4 - [ACAVAM121](#)

## Class Activities

- Learners discuss Christmas seafood, with a focus on lobsters
- Learners watch a video to learn how lobsters inspired the design of the X-ray telescope
- Learners craft a LobStar Tree-Topper for the festive season
- Extension activities offered for Science, Geography and Food Technology Stages 3-6

# LESSON PLAN: THE LOBSTAR

## Starter (10-15 mins)

Begin with a short class discussion about seafood at Christmas time, asking questions such as:

- Do any students eat lobster, prawns or other kinds of seafood at Christmas time
- What are their favourite Christmas seafood dishes?
- Why do they think these foods are traditional for their families?
- Do learners know where their seafood comes from?
- Do they know if their seafood is sourced sustainably? How might they find out?

Next, explore what learners already know about lobsters. Provide them with fun facts about lobsters, including some differences between Australian and European/American lobsters. Facts can be found on the [Christmas Lobster: Fishery Factsheet](#).

## Main activity (30-40 mins)

Show learners the clip [The space telescopes inspired by lobsters](#) (01:32) to learn about the special relationship between lobsters and outer space!

Explain to students that they will be constructing a fun LobStar Tree-Topper, to celebrate Summer seafood in Australia. Provide them with the LobStar Instruction and Activity sheets. You may also show them the [short instructional video](#) for guidance.

## Discussion (5 mins)

Discuss with learners what they plan to do with their LobStar craft, and how they will celebrate the holiday break with their families.

To continue learning, explore our range of extension activities on pages 5&6.

# INSTRUCTIONS: THE CHRISTMAS LOBSTAR

## You will need:

- LobStar Activity sheet (preferably printed on a **red A4 sheet of paper**)
- Scissors
- Glue or sticky tape
- Empty toilet roll (Note: if there are not enough toilet rolls for each learner, toilet rolls can be reused to re-roll the LobStar and simply slid off ready for the next learner to use)
- Craft supplies to decorate (e.g. colouring pencils, texters, glitter, stickers, googly eyes)

## Instructions

### [Watch the instructional video](#)

1. If decorating your LobStar with colouring pencils/texters/glitter, do this before cutting it out. If drawing on the eyes, put them in the circles next to the antennae
2. Cut out your LobStar along the black solid lines
3. Add any further decorations like stickers or googly eyes
4. Stick LobStar body around empty toilet roll
5. Stick LobStar legs on the underside of the body
6. Fold legs and antennae along dotted lines. If you're unsure which way to fold them, refer to the instructional video (link needed)
7. Place LobStar on top of your tree and make them the star!

**Note:** Keep LobStar crafting away from cute pets as they may cause a distraction!
