

WCPO FACT SHEET

Harvest Strategy Condition Milestones for WCPFC-managed Stocks

The MSC Fisheries Standard Version 3.1 contains requirements (Section SE) to incentivise the development, adoption and implementation of robust and precautionary harvest strategies (HS) in stocks managed by Regional Fisheries Management Organisations (RFMO). Stocks managed by the WCPFC and certified against Section SE are: Western Central Pacific Ocean (WCPO) skipjack, yellowfin, bigeye, South Pacific albacore, and Southwest Pacific swordfish. The milestones and deadlines for conditions associated with each stock are provided in the table on the following pages.

ANY QUESTIONS?

If you have any questions,
please contact
wcpotuna@msc.org

NOTES

1. Skipjack has completed all Section SE milestones and is therefore not included in the table.
2. For the stocks outlined below, the blue cells represent the final deadline to complete the Section SE milestones. This deadline cannot change.
3. White cells represent milestones that are either 'on target'. These can be assessed to be 'behind target' if not met by the Section SE due date.
4. A check mark under "Section SE Due Date" represents Section SE milestones that have already been closed for that stock.
5. Section SE due dates represent the time when the independent assessment teams meet on an annual basis to assess the progress of the conditions (CAB harmonization meeting). This is timed so that the yearly cycle of WCPFC meetings is completed prior to assessing the progress of the conditions.
6. 'Relevant meeting' under the WCPFC column refers to the relevant meeting where the information relevant to the milestone needs to be addressed at the latest. This refers to either the Scientific Committee meeting (SC meeting) in August or the WCPFC annual meeting (WCPFC meeting) in December.
7. 'TTM revision' refers to the meeting where Tropical Tuna Measure (TTM) revision is planned. The TTM is the Conservation and Management Measure (CMM) that focuses on WCPO skipjack, bigeye and yellowfin.
8. Milestones h1 and h2 do not have an explicit date in the WCPFC harvest strategy workplans.
9. Independent assessment teams will be assessing progress on Milestone a for Southwest Pacific swordfish in both 2027 and 2028.
